connect, visualise & improve
smart factories

 valuechain

Who are Valuechain?

We provide smart manufacturing software to build world class supply chains. Our productivity, collaboration and intelligence solutions enable organisations to improve competitiveness and become Industry 4.0 ready.

What is AnalytiQs?

AnalytiQs is an effortless data visualisation tool, that consolidates all your data into one place, and makes it easy to understand your business at a glance.

Streamlining data entry and analysis, AnalytiQs automatically pulls data from connected systems in real time, and creates powerful graphs and charts to visualise your data, enabling you to spot trends and identify root causes at the touch of a button.

AnalytiQs enables you to share your findings with employees, colleagues, customers or suppliers to empower your team, make improvements, and grow your business. Ensure you get the right data to the right people, at the right time to make informed decisions with AnalytiQs.

Why AnalytiQs?

Everything you need, in one place

Connect to all your data – whether it's ERP/MRP systems, standalone databases, spreadsheets or cloud applications. Access all your data in one place, and view it all through your personalised dashboard. Organise your dashboard by teams or departments to gain even clearer insights.

Smart Dashboards

Your personalised dashboard updates automatically as it pulls data in real-time and places it right at your fingertips, so it's available when you need it most. And when you want to update stakeholders, securely share your reports cross platform, as a PDF or in an email.

Unlimited ways to visualise your data

With many chart and graph options available, you're guaranteed to find the best way to view your data, so it's meaningful to all your stakeholders. Configure your charts to your needs, with endless customisable options.

Best Practice Reports Library

Unsure where to start? Search through our best practice reports library and select a pre-built template to show the information you need, with none of the hassle. If you can't find exactly what you're looking for, then you can amend library reports or start from scratch and create advanced reports in seconds.

“We have successfully collaborated with Valuechain to innovate and integrate our business intelligence using AnalytiQs. They are a solutions based business with a background in manufacturing and are always several steps ahead of the game.”

**Paul Mellor, Technical Director
Hyde Aero Products Ltd**

Easy to get started

We can integrate with most systems within minutes, thanks to our intuitive set-up wizard. Once you are ready, AnalytiQs' intuitive user interface and online help resources ensure it's simple to get to the data you need, when you need it.

Knowledge at your fingertips

Interested to know more about the data behind your charts? Just tap the segment and drill down into your data to gain instant knowledge at the touch of a button. Understand why performance was so good that month and learn how to replicate it.

Access Your Data Anywhere

AnalytiQs is hosted in a secure data centre, so it doesn't matter if you're in the office, on the shop floor or on business overseas, you can always stay up to date with the latest information on how your business is performing.

Improve & Grow

Access and share best practice business intelligence quickly, to drive continuous sustainable improvements. Make informed decisions, spot trends and predict upcoming performance to stay ahead of the competition and grow your business.

How does it work?

CONNECT all your internal business systems and spreadsheets into one place to create a consolidated data source.

ANALYSE your consolidated data through highly customisable reports or select from our comprehensive library of best practice industry reports.

VISUALISE your data through advanced charts and personalised dashboards.

COLLABORATE with cross functional teams and supply chain partners by securely sharing the right data with the right people at the right team.

ACCESS your real-time business data and key performance measures anytime, anywhere and securely through PCs, laptops, tablets or mobile phones.
