

# audits

streamline audits & corrective  
action management

# Who are Valuechain?

We provide smart manufacturing software to build world-class supply chains. Our productivity, collaboration and intelligence solutions enable organisations to improve competitiveness and become Industry 4.0 ready.

## What is Audits?

Audits is a paperless audit management system, that consolidates all your auditing requirements into one integrated organised system, that you can access anywhere using mobile devices.

Designed to help manufacturers stay organised, save time and reduce paper usage, Audits comes with a library of best practice compliance forms that cover a range of business needs.

Whether you need to monitor and analyse Health & Safety, Environmental or Quality compliance, Audits is here to help.

## Why Audits?

Everything you need, in one place

Replace fragmented, loose paper-based filing systems with one consolidated Library. Have complete control by editing, amending or building your own audit compliance forms and fill a personalised library with ISO 9001, AS9100, H&S or Nadcap compliance forms, so everything you need is at your fingertips.

### Complete your Audits, anywhere

Stored in a secure data centre, online, you can access your library wherever you are. Forms are downloadable so they are available offline and via our Audits app; so you can complete them on your desktop, tablet or even your phone whilst out on the shopfloor.

### Schedule Audits

You can assign due dates against multiple different audits, and set up email reminders, minutes, or weeks in advance. It's even possible to integrate dates into your existing work calendar to ensure you get started right on time.

# Everything you need

## CUSTOM AUDIT FORMS

Forms designed by you, for your business

## A RANGE OF DATA

Add pictures or videos  
Upload supporting files

## CLOUD SYSTEM

Stored online on a secure server, to access anywhere

## AUDIT SCHEDULING

Set due dates & reminders  
Add to calendar

## PERFORMANCE TRACKING

Check the progress of tasks, teams and individuals

## VALUECHAIN

Dedicated training, support and help

## DATA VISUALISATION

Advanced reporting to demonstrate issues

## CONSOLIDATED LIBRARY

Create your own personal library, with all your audits.

## TEAM MANAGEMENT

Assign audits and resolution tasks to team members

## MOBILE

Complete audits on mobile devices using our app

## USABILITY

Sleek effortless interface to make auditing simple

-  Audits can replace the use of tracking spreadsheets, saving duplicated effort & valuable time
-  Audits provides full traceability of who created & completed forms & when amendments were made
-  Audits has advanced reporting capabilities to ensure you make informed decisions
-  Audits puts you in control of your audit preparation & performance

## Improve & Grow

Audits give you the power to take control of your audits with advanced reporting and data visualisation integrations. Spot trends in compliance reports to discover problem and identify issues. Customise your dashboards to display only the most important information, so the data you need is available in the right place, at the right time, in the right way.

## Assign Tasks

With audits, it's easy to assign actions to other team members, so even if multiple audits need completing at once, you can be sure they will be taken care of. And, if you find non-compliances that need addressing, you can create a task within audits, and share it using your existing CRM, emails, or directly to colleagues' Audits Dashboard.

## Track Progress

Once you've assigned tasks to teammates, you can monitor their progress on your team viewer dashboard. Receive instant updates when delays occur, and notifications when a team member moves on to a new task.

# Transform your business...

All of our business improvement solutions can be fully integrated with many production control solutions, including our own DNA range, so we can offer business intelligence capture, new product introduction tools and much more.

**Streamline Operations**
