

iQapture

capture business intelligence &
drive continuous improvements

valuechain

Who are Valuechain?

We provide smart manufacturing software to build world class supply chains. Our productivity, collaboration and intelligence solutions enable organisations to improve competitiveness and become Industry 4.0 ready.

What is iQapture?

iQapture is a flexible data capture and analysis tool that generates business intelligence. It enables teams to capture intelligence throughout the product lifecycle, from shopfloor to board room, by capturing issues and improvement opportunities; managing corrective actions and improvement plans; and generating advanced reports and smart dashboards.

iQapture offers the flexibility of spreadsheets but with many additional benefits that make it so much easier to drive sustainable continuous improvements. It can be integrated with existing business systems or used as a stand-alone solution.

Developed in collaboration with Bentley Motors and the University of Liverpool, iQapture is perfect for any company looking to convert data into intelligence.

"Valuechain understand the challenges of advanced manufacturing businesses and the importance of real-time data that can be relied upon to make informed decisions. iQapture has generated savings of 48% and is streamlining our new product launch process."

**Manufacturing Engineering Manager,
Bentley Motors**

iQapture replaced multiple fragmented spreadsheets to streamline new product introduction processes and automate visual management on the Bentley Motors shopfloor

Why iQapture?

-  **Drive innovation** by simplifying how teams capture improvement opportunities through mobile devices and smart dashboards.
-  **Resolve issues quicker** through streamlined issue capture, action planning and exception management.
-  **Streamline** data entry and manipulation so your team can focus on embedding improvements and corrective actions.
-  **Integrate cross functional teams** to promote inter-departmental transparency and collaboration.
-  **Build business intelligence** by ensuring lessons are learned and embedded rather than logged and forgotten.

Spreadsheets

Vs.

iQapture

-  Very quick & simple to create improvements plans, track progress & generate KPIs
-  Improvement & corrective actions are assigned & tracked manually
-  Limited version control & audit trail
-  Not designed for mobile devices
-  Not easy to collaborate with external partners

Quick & simple,
but fragmented & manual

-  Even quicker & simpler; iQapture is designed specifically for continuous improvement
-  Integrated task consoles & exception reporting
-  Full audit trail of who updated what & when
-  Create intuitive mobile capture devices in seconds
-  Secure & simple collaboration with external partners

Even simpler, integrated,
automated & mobile

How does it work?

BUILD highly customisable data capture interfaces for each stage of the product lifecycle to capture issues, improvement ideas and innovation opportunities from users.

CAPTURE data through PCs or mobile devices using multiple formats such as free type text, multiple choice questions, photos, videos and much more.

ANALYSE captured data through advanced reporting and create comprehensive smart dashboards to monitor the entire product lifecycle.

COLLABORATE with cross functional teams and external partners to capture and share data to streamline internal and external communications.

DIAGNOSE root cause issues, assign corrective actions and solve problems collaboratively to embed continuous sustainable improvements.

Join Valuechain

Valuechain works hard to build close, long-term relationships with its customers. When you purchase a solution from us, you buy into a partnership with our dedicated team who work to ensure you achieve maximum return on your investment.

We offer support via phone, on-line remote access, support forum or on-site.

Join the growing list of global advanced engineering companies who are happy to depend on us. Visit our website or contact us to find out more...
